Peacock Salt De-icing App

We have developed this free app for you. You can use it to calculate the amount of salt required for your site. This not only gives an idea of the requirement for the season ahead, but will give you an indication of how much salt you should be spreading per application – not as much as you might think!

The app will also send spreading alerts whenever the weather reaches personalised parameters. Our salt is clean to use, leaving no dirty residue to be trodden into buildings and vehicles. After a winter season there is no residue to sweep up and no drains to be cleared. Peacock white salt is carefully screened to produce the most effective spread pattern increasing pedestrian safety and the working life of equipment.

FREE

FEATURES

- Get snow alerts for all of your locations
- Tap to define de-icing area or walk using pedometer
- Learn how much de-icing salt you actually need
- Track your salt spreading in a map and send by email when finished

Available for iOS and Android by searching Peacock Salt

Our Story

1800s

The industrious and enterprising J.C. Peacock founded Peacock Salt for ship chartering and agency work on the River Clyde. His success came through sheer diligence and courage. His legacy of not being afraid to depart from tradition has remained with the company ever since, enabling Peacock Salt to evolve and thrive over the years across generations.

100 years ago

The Founder's son took the reins and ran the business with integrity and efficiency. As the Company grew, so too did its networks, reaching out across the Atlantic for adventures with Prohibition, importing and exporting coal and salt as well as its ship owning/agency work.

War time

70 years ago, Peacock Salt survived the war years with resilience and wise decision making. Our international relationships all across post-war Europe, North Africa and North America were re-established and roots restored laying the building blocks for the excellent connections which we enjoy today.

25 years ago

The Company focused on its salt-importing and associated products and the last ship was sold. Dedicated investment and innovation increased the product range, lines were automated within the winter sector and established practices for cosmetics, water softening, tanning and other salt uses were scrutinised and honed to become the best on the market. Enterprise, innovation and uncompromising service became essential to our core values.

Today

5 generations later, the MD and founder's great great grandson, Gregorie Marshall, is incredibly proud of the experience and heritage Peacock Salt has but refuses to rest on laurels: "we are committed to understanding the products and our customer needs more than ever. As a family business, we take the long term view – customer/employee relations, integrity and trust are paramount, over and above turnover – we are, indeed, Serious about Salt".

Winter Salt

Formed in 1874 and entering the de-icing market in 1947, Peacock Salt is the UK's longest established importer of de-icing salt. Our annual supply to the UK has exceeded 650,000 tonnes.

Peacock Salt has been developing products and services to meet our clients' changing needs. This broad range of products includes liquids, which offer low working temperatures, as well as low and non-corrosive and longer-lasting de-icers which have been developed during extensive trials throughout the UK.

Our new range of purpose-built salt spreaders cover all areas and surfaces with unprecedented accuracy and control (See Winter Equipment page 15). We have also developed a free App which helps you make good decisions for your Winter Maintenance Management (See page 3).

TYPICAL APPLICATION	General coverage, hand application, spreader application. Clean to use.	Dry salt – particularly suited to spreader application, general coverage.	Artificial grass, synthetic pitches.	General applications, better suited to roads due to dirty residue.	Ideal for home users – convenient pack sizes. Clean to use.	Home / driveway usage.

De-icing Guidelines/Suggested De-icing Rates

Please find below approximate quantities for preventative treatments of frost, ice and snow conditions. Given the variables involved, these are offered as a guideline only and Peacock accept no liability.

Granular De-icers

(Salt / Winter Wizard / etc.)

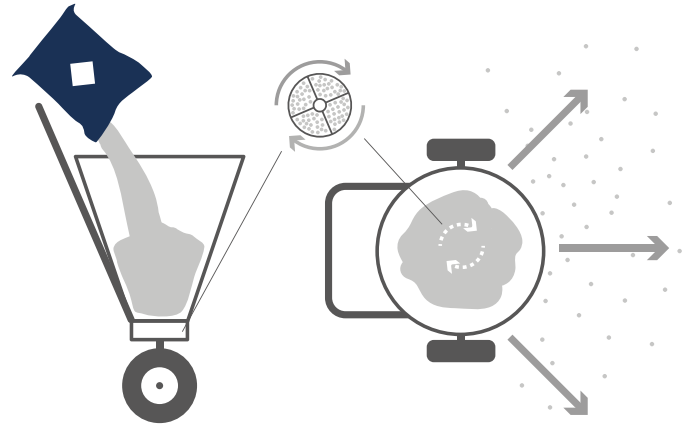

FORECAST CONDITION	TEMP	SPREAD RATE
Frost / Ice	0°C to -5°C	10-20 grams /m ²
	Below -5°C	20-30 grams /m ²
Snow	0°C to -5°C	25-40 grams /m ²
	Below -5°C	40-50 grams /m ²

Liquid De-icers

(Brine / ProBrine / Viaform / etc.)

FORECAST CONDITION	TEMP	SPRAY RATE
Frost / Ice	0°C to -5°C	20 ml /m ²
	Below -5°C	
Snow	0°C to -5°C	40 ml /m ²
	Below -5°C	

How spinner spreaders work

See pages 17-19 for full range of drop spreaders, spinner spreaders, flicker spreaders and brine sprayers

Please note:

Preventative treatments (before freezing conditions) are more effective than applications after the freezing event has occurred. Inclement weather factors such as wind and precipitation will require increased application rates.

For best results in snow conditions, the snow must be cleared before applying the de-icing treatment.

TYPICAL APPLICATION	Areas of high value - metal components (airports, helipads, train stations, race tracks) near watercourses, gardens, inner city, usage on specialist materials.	Areas where reduced corrosion is required (rail platforms, car park decks etc).	Extreme low temperatures, Ultimate fast and long residual performance.	Low temperatures, very fast and good residual performance.	Low corrosion. Not suitable near aquatic life.

Winter Salt

Winter

White De-icing Salt

Our white de-icing salt is marine salt harvested from sustainable sources around the Mediterranean Sea and is almost 100% pure sodium chloride.

The Benefits of de-icing with White Salt

- White salt does not leave behind the same messy residue as traditional brown salt (grit) making it perfect for pathways, pavements, playgrounds and commercial estates where cleanliness is important
- With a purity level of almost 100% sodium chloride, every particle plays a part in the de-icing process
- It is graded particle sizes for even distribution
- Free flowing, ideal for use in spreaders
- Conforms to BS3247:2011, the British Standard for de-icing salt

KEY

- Clean de-icer
- Contains anti-caking agent
- Approx max grain size (mm)
- Low temperature de-icer
- Easy to handle bag weight

White De-icing Salt Bulk

CODE: DEI9999

For your convenience Peacock Salt choose to be explicit in the labelling of their bagged salt products in terms of weight. The contents of bags labelled 'Handy', 'Maxi' may vary.

Brown Rock Salt

Also known as road grit and traditionally used by local authorities across the UK in winter. This is a raw, indigenous, mined product and therefore includes naturally occurring grit particles. Typically the salt can range from 5-8% insolubles. Conforms to BS3247:2011, the British Standard for de-icing salt.

Winter Wizard

Winter

Great for use at home

Winter Wizard is a range of easy-to-use de-icers from Peacock Salt, tailored specifically to the winter needs of our residential customers and trade and retail markets. The pack sizes are also designed to be lighter weight and easier to handle making them ideal for use by a wider audience. Overall, an important part of your winter emergency kit.

KEY

Winter

High Performance De-icers

A range of specialised de-icers including low temperature and low corrosion options.

Winter conditions are generally combatted with sodium chloride salt as it performs well in the temperatures typically experienced in the UK. Salt does have its limitations however, and when a performance de-icer is required to offer lower de-icing temperatures or to have a reduced impact on the surrounding environment, Peacock Salt can deliver a range of high performance de-icers.

KEY

-  Clean de-icer
-  Low environmental impact
-  Corrosion resistant
-  Pet friendly
-  TO -50°C Low temperature de-icer
-  Easy to handle bag weight
-  Concrete safe

Viaform

- 
-  TO -50°C
- 
- 
- 
-  eco

NON-CORROSION

Viaform is a non-corrosive de-icer which is non-toxic for humans, animals, plants or water organisms, fully biodegradable, and free from salt (no nitrogen or chloride content). It offers a high material compatibility due to its environmentally friendly corrosion inhibitor. Viaform is suitable for keeping airfields, railway platforms and other corrosion sensitive areas free from ice and snow.

Viaform Granular is an extremely efficient, granulated de-icing agent based on sodium formate and is especially used for the removal of thicker ice layers of 3-12 mm. The granules will penetrate, melt and undercut the ice layer and thus enable an easy mechanical removal of the ice ('undercutting' effect). Also available as a liquid de-icer (see p13).

Viaform Non-corrosive De-icer 0.16-4mm 2 x 500kg Bags

CODE: VIA1000

Procoat

- 
-  TO -7°C
-  6mm

Procoat is a low corrosion de-icer. It is 70% less corrosive than normal de-icers due to a special inhibitor, suitable for keeping fire escapes, railway platforms, bridges and other corrosion sensitive areas free from ice and snow. Also available as a liquid de-icer.

See liquid de-icers page 13-14

LOW CORROSION

Great sized bag for transporting

Liquids available on page 13-14

Calcium Chloride

LOW TEMPERATURE

TO -32°C

Calcium chloride offers an extremely low de-icing temperature of around -32°C. Like sodium chloride, it is a hygroscopic material that attracts moisture, quickly starting the de-icing with the formation of brine.

Calcium chloride is also exothermic, and releases heat as it dissolves in water. As a result, it is a particularly effective de-icer at colder temperatures which serves to heat up the surrounding area upon application, kick-starting the melting process.

Calcium Chloride Flake 77-80% Tech Grade 1-6.3mm Grain 25kg Bag

CODE: CCFRG0025

Calcium Chloride Flake 77-80% Tech Grade 1-6.3mm Grain 500kg Bag

Liquids: The Modern Solution to De-icing

Liquid de-icers are commonly used throughout Central Europe and North America as an alternative to granular, rock salt treatments and are proven to be equally as effective whilst offering significant cost savings and greater environmental benefits.

Liquids are easier to store and handle than granular materials, requiring tanks and pumps as opposed to covered storage and palletised materials. They appeal to a wide range of customers who are keen to reduce their reliance on manual handling. Liquids are sprayed rather than spread, which ensures a lot more control can be applied to make sure that the application is targeted exactly where you want it, cutting waste down to a minimum.

Pre-wet & Direct Liquid Applications

Pre-wet treatments are a combination of dry rock salt and wet brine (liquid salt). Direct liquid applications (DLAs) are when liquid only de-icers are used to combat the winter conditions.

Peacock Salt has a growing range of brines and other liquid de-icers that will enable you to take a more considered and tailored approach to your de-icing activities.

Probrine is a 20% solution liquid de-icing brine which blends white marine salt with a corrosion inhibitor to reduce impact on any metal by over 80%. Suitable for application using backpack or hand-push sprayers.

KEY

- Clean de-icer
- Corrosion resistant
- Pet friendly
- Lightweight
- Low temperature de-icer
- Easy to handle bag weight
- Low environmental impact

Liquid sprayers available on page 19

ProBrine Liquid De-icer 15L Jerry Can

ProBrine Liquid De-icer 20L (4 x 5 litre)

ProBrine Liquid De-icer 800L or 1000L IBC

Viaform is a corrosion resistant de-icer developed for the aircraft industry. It surpasses all de-icing standards, working to extreme low temperatures and offers excellent coverage in a liquid format. It is not toxic to humans, animals or aquatic organisms and is fully biodegradable in aqueous systems without causing a damaging oxygen depletion.

Viaform Liquid is a potassium formate based solution that is perfectly suited for de-icing thinner ice layers as well as for preventive application when weather conditions are impending.

Viaform Liquid De-icer 15L Jerry Can

Great size of drum for garage storage

Viaform Liquid De-icer 700L or 1000L IBC

Sodium Chloride Liquid

Sodium Chloride liquid is the primary de-icer used by highway spreaders when delivering a pre-wet treatment. It offers the same de-icing properties as granular sodium chloride salt, but it is faster acting at melting away ice and snow and leaves a more even spread with no scatter wastage.

Sodium Chloride Brine 20% 800L or 1000L IBC

CODE: BRI200800
CODE: BRI201000

Bulk Sodium Chloride Brine

CODE: BRI209999

Sodium Chloride Liquid De-icer 15L Jerry Can

Hilltip SprayStriker™

For further information on Hilltip products see pages 23-26

Calcium Chloride Liquid

Similar to its granular format, Calcium Chloride Liquid is an effective low temperature de-icer, melting ice down to around -32°C. Given its hygroscopic nature (desire to absorb water), it is also easier to manage than solid granules which need to be kept sealed away from atmospheric moisture.

Calcium Chloride Liquor 28-30% 800L or 1000L IBC

CODE: CCL0800
CODE: CCL1000

Magnesium Chloride

Like Calcium Chloride, Magnesium Chloride is both hygroscopic and exothermic, and it's properties make it functional as a low temperature de-icer to around -18°C.

Magnesium Chloride 32% Liquid 1000L

CODE: MGCLIBC1000

Winter Equipment

To complement the production and application of our extensive range of de-icing materials, Peacock Salt offers a wide portfolio of equipment and machinery.

Peacock Salt have scoured the market for the best technology available for each sector and can offer a combination of both UK manufactured equipment and specially selected imports from our industry partners. From home users up to highways maintenance contractors, our wide range of winter equipment is selected to ensure it delivers when you need it most.

- Spreaders
- Sprayers
- Grit Bins
- Shovels & Scoops
- Bundles
- Safety Signs
- Hilltip
- Saturators

We have been installing industry-leading winter salt saturators across the UK for over 20 years

Spreaders

2 year warranty available subject to terms & conditions.

Hand Pushed Spinner Spreaders

Peacock Salt supply a comprehensive range of minimal assembly salt and liquid spreading equipment, treating anything from driveways and footpaths to commercial car parks and roads.

Spinner Spreaders enable large areas of ground to be covered with minimal effort. The salt is held in a storage hopper and gravity fed onto a spinning distribution disk, which evenly dispenses the salt in a radial motion away from the spreader.

Spinner Spreaders are ideal for de-icing driveways, car parks, playgrounds and other large areas where mass salt coverage is required in a short period of time.

Sprayers

Winter Equipment

Liquid sprayers are used to quickly and accurately deliver liquid de-icers to combat ice and snow. Sprayer technology relies on pumps, pressure and tanks which significantly reduce the level of manual handling required by the user. As liquids are sprayed not spread, greater control is offered, ensuring that applications are delivered exactly as targeted.

Liquids can be easily selected and tailored for the application and the sprayer will deliver irrespective of the chemical, meaning you can operate a wide array of different de-icing materials (e.g low corrosion, high performance, etc.) best suited to the end application, with the same sprayer.

CASE STUDY

Feedback from school janitors is that they are in favour of liquid de-icers over traditional rock salt applications. Liquids are fast acting and far cleaner. Both factors are massively important in a school playground environment.

No granular salt materials are left behind, so the temptation for young children to eat the salt crystals is completely removed.

Hilltip Spraystriker

Hilltip SprayStriker™

The Hilltip Spraystriker enables users to de-ice large areas of ground and mounts on to ATV, pickup and tractor vehicles. The tracking lets users report de-icing activities to end clients.

Grit Bins

When winter conditions arise, roads and walkways are prioritised to ensure safe access to the most vulnerable. Grit bins are an effective means of getting the general public involved in snow and ice clearing, allowing them to help themselves and their neighbours in times of need which can take some the strain away from the authorities.

In addition, private companies have a duty of care to their employees, the provision of grit bins around sites and car-parks helps promote good winter maintenance practices.

Our grit bins are made from hard-wearing, durable composite plastics which offer the right balance between cost and durability. We have a range of different styles and sizes with lockable and stackable options to suit most eventualities.

Safety Signs

Thermosign is a weather reactive warning sign which displays a warning message in cold weather using ink and printing technology. The main body of the sign is photoluminescent – it glows in the dark. The warning element is thermochromic – the ink starts to show when the temperature drops below around 3 degrees. Signs have a working life of one winter season and can be mounted on glass, on boards or on existing signs.

Multi-season

Winter Equipment

Hilltip are fast becoming the spreader of choice for the UK Winter Service Industry. Their innovative equipment for UTV, pickup and tractors help contractors and councils to lower running costs, improve winter resilience and service delivery. Made in Finland, Hilltip know how to deal with the worst of

winter conditions. Peacock Salt are the sole importers of Hilltip products to the UK and offer quick delivery, installation, mobile repairs, spares and storage. Our 2-year warranty covers all Hilltip products. To book a free demonstration, call Peacock Salt on 01292 292 000.

Hilltip IceStriker™ Combi Spreader

HILLTIP ICESTRIKER SPECIFICATION LEVELS

Hilltip IceStriker™ Combi Spreader

The lightweight polyethylene hopper is ideal for treating roads, car parks, footpaths and cycleways. The hopper has an in-built liquid tank which enables three different types of application: salt, pre-wet salt (mixture of brine and salt) and direct liquid application. A manual hose reel, bladder tank and spraybar can be fitted to increase the liquid capabilities of the unit and enable all-season use for fertiliser.

MODEL	550	850	1100
Salt Capacity*	788 KG	1100 KG	1375 KG
Liquid Capacity	330 L	450 L	450 L
Weight (empty)	145 KG	190 KG	215 KG
Total Length	2105 mm	2605 mm	2605 mm
Width	1250 mm	1250 mm	1250 mm
Min. Truck Bed Length	1200 mm	1700 mm	1700 mm
Max. Spread Width	8m	8m	8m

*If using white marine salt

Made in Finland

IceStriker™ Stainless Steel Spreader

380 L capacity with optional liquid system. Designed for smaller vehicles such as UTVs.

MODEL	380
Salt Capacity (rounded)	380 L
Liquid Capacity	150 L
Weight (empty)	120 KG
Total Length	1670 mm
Width	910 mm
Min. Truck Bed Length	1110 mm
Max. Spread Width	8m

Hilltip SprayStriker™ De-icing Sprayer

MODEL	500	1000	1500	2000
Tank Capacity	500L	1000L	1500L	2000L
Weight (empty)	180KG	230KG	280KG	350KG
Length	1000mm	1600mm	2250mm	2850mm
Width	1060mm	1060mm	1060mm	1060mm
Max. Spray Width	5m	5m	5m	5m

With two 12V twin pumps, the SprayStriker™ has an output of up to 36L/min providing ample power to treat footways, pathways and other areas in which traditional granular treatment is not desirable. The 2 metre spraybar has 14 nozzles which can extend the spray width to 5 metres. The pumping system and CPU unit is protected inside an easy to reach stainless steel housing and is designed for use with a range of de-icing and agricultural liquids.

Jet-It™ Mobile Pressure Washer

These versatile mobile pressure washers enable easy washing/spraying of yards, graffiti, gardens, pavements, stairs, roofs, machines, facilities etc. Includes 20m hose reel. Hot Water option available.

Hilltip

GPS tracking

Winter Equipment

SnowStriker™ Snow Ploughs

Hilltip's SnowStriker™ range are the first of their kind to be built in Europe. With the Hilltip Quick Hitch system and all-in-one electrical plug, mounting and demounting can be done simply and swiftly. The curved, powder-coated blade is made of high-strength steel making it a light but durable plough. The cutting edges come in polyurethane or high-strength steel and are fitted using trip springs segments in 4, 6 or 8 segments depending on width. This helps protect the plough and vehicle when striking kerbs and objects or on uneven surfaces. All Hilltip ploughs use a common Hilltip in-cab controller which works hand in hand with the Spreader/Sprayer controller. All ploughs come with optional light fittings. Hitch equipment is supplied specific to the make and model of the vehicle. Peacock Salt provide installation services.

Straight Blade

Range from 1650 mm – 3000 mm designed for UTV, SUV, pickup 3.5t-18t trucks including DIN plates.

V-Plow

Multi-positional plough for more flexibility in ploughing techniques. Range from 1850 mm – 2400 mm designed for UTV, SUV, pickup or light truck or tractor and loaders.

SweepAway™ Push Broom

A simple and effective solution for professional sweeping designed for forklifts, tractors, loaders and excavators. It can handle a variety of materials such as leaves, sand, rocks, debris, snow and slush. Available in Light, Medium and Heavy duty and in sizes 1500 mm – 4000 mm.

HTrack™

HTrack enables users to track, trace and report on de-icing activities. Live spreading, spraying or ploughing information is sent to a website which users can communicate to end clients. Any complaints can be challenged quickly and effectively by producing time-stamped spread width, volume and application rate data from historical activities.

Made in Finland

Hilltip IceStriker™ 1600-2600

12/24v Dual wall hopper spreader in three sizes, designed to carry 1600-2600L of salt/sand and 900L liquid. Choose between two feed mechanism options: auger or belt conveyor drive. The spreader also has GPS speed-control as a standard feature and tracking with HTrack™ as an option. The machine can also be optionally equipped with a pre-wetting function and a dual spraybar and twin pump for increased spraying capability (25ml/m² at 25km/h). The spreader is the ultimate fit for trucks in 5, 5-7, 5t range.

Hilltip IceStriker™ 120L & 200L

120 or 200L spreader for pickup tailgate, tractor 3-point or wheel loader. Designed to spread all types of spreading material, bulk, bag, sand and gravel. Auger and spinner can be adjusted separately. Operated wirelessly through the next generation control system: HillTip StrikeSmart™ control App. Smartphone included, with GPS speed-control as a standard feature and tracking with Hilltip HTrack™ as an option.

Hilltip IceStriker™ 600TR & 800TR

600 or 800L tractor mounted spreader with double-wall construction integrated tanks for 330L liquid. The tractor mounted IceStriker™ includes GPS speed-control as a standard feature and tracking with Hilltip HTrack™ can be selected as an option. The machine can also be equipped with the same pre-wetting function and spraybar as the IceStriker™ 550-1100 spreaders offer.

In-Cab Controller

The in-cab controller enables drivers to customise the spreading session according to the site and conditions. Using GPS, spreading / spraying rates are adjusted according to the speed of the vehicle or can be manually controlled. It provides easy to use functionality enabling the driver to remain within the vehicle throughout operations:

Spread rate (GPS controlled or manual), spread width, vibrator control, calibration, application type (salt, pre-wet, direct liquid application) and safety lights.

Hilltip SnowStriker™ V-Plow

Saturators

Winter Equipment

Delivering a Pre-Wet Winter Service

Peacock Salt are pioneers in Pre-Wet Technologies. We were among the first to introduce liquid-salt (brine) saturators to the UK. Now with over 100 salt saturators installed, we are continuously innovating and improving the range.

From our national footprint, we deliver comprehensive service and maintenance packages and provide expertise to build bespoke solutions to suit each Winter Service depot.

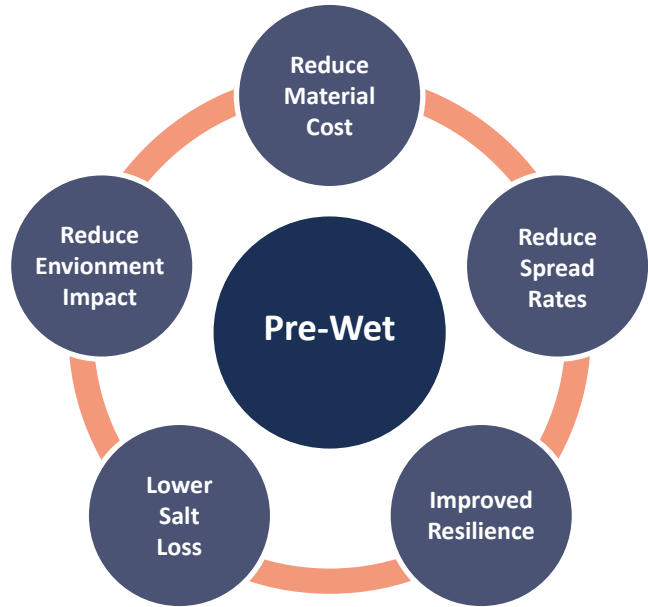

What is Pre-Wet?

'Pre-Wet' is the process of combining granular and liquid de-icing materials to treat roads and footways. The technique has been used globally since the 1980's and widely in the UK for over 20 years. Pre-Wet enables Councils, Local Authorities and Highway Operators to realise massive cost savings whilst maintaining a highly resilient response to winter conditions.

What is required?

- Combi-Spreaders
- Saturators

Capital investment decisions are crucial to realise the full cost-saving benefits of pre-wet. Low quality equipment can lead to downtime, high maintenance costs and even ineffective de-icers. Peacock Salt offer servicing to ensure equipment goes in to the winter period in excellent condition.

Saturators

Winter Equipment

Liquid de-icers are a proven means to delivering a lower cost winter treatment. Tried and tested in central Europe and the US, the use of liquid de-icers in place of traditional methods can significantly reduce your salt usage, saving money and reducing the environmental impact.

Our saturator systems have a proven record of longevity, ensuring that you can maintain your service offering year after year.

To ensure performance long-term, we offer an unparalleled after-care service with a dedicated team to help you get the most out of your salt saturator now and in the years to come.

We have developed a range of saturators that will suit any budget or size of operation, and with an industry beating 5-year warranty available, we are confident that your transition to liquid de-icing will be straight-forward and cost-effective.

Refractometer CODE: RFTMTR

A handheld, portable salinity measuring device suitable for managing salt levels in brine tanks, de-icing saturators and aquariums. The optimal brine concentration for de-icing is 20% – 23% and the refractometer will enable you to quickly ensure your brine is strong enough.

Supplied with a protective carry case and pipette.

Water Softener Salt

We offer a complete range of Water Softener Salt from bulk-tankered PDV and Granular Salt, packed Granular, Tablets and Block Salt. All our Water Softener Salt comply with the internationally recognised BS EN 973:2009 standard for salt in water treatment.

Water Softening Salts

- Fine Grade PDV for Water Softeners
- Hydrosoft Granular
- Refined Granular Water Softeners
- Tablet and Block Water Softeners

Every year,
we supply
enough water
softening salt to
fill 9000 Olympic
swimming
pools

Water Softener Salt

Fine Grade PDV for Water Softeners

PDV is a high purity free flowing vacuum salt suitable for large commercial water softeners where the salt is discharged into a bulk saturator.

Industrial Grade PDV Vacuum Bulk

CODE: IVS9999

PDV Food Grade Vacuum Salt 25kg Bag

CODE: PDV0025

PDV Food Grade Vacuum Salt Bulk

CODE: PDV9999

Hydrosoft Granular

Made from high purity vacuum salt, Hydrosoft Granular is the leading UK brand.

source.

Aquaculture Salt

Seamix

Seamix is a specially formulated simulated sea water mix for the aquaculture industry. Simple to use: to create artificial seawater just mix with tap water to create a synthetic sea environment for shellfish purification and holding tanks. This DEFRA approved formula is ideal for use with lobsters, mussels, oysters and other sea life aquariums. Create clean seawater free of bacteria, perfect for aqua-cultural operations and equipment testing.

CODE: K321000

Rock Salt 3.2 - 0.4mm grain Bulk

CODE: K329999

Vacuum Salt for Fish Processing

Sodium chloride is extracted as a brine from natural halite deposits by solution mining.

After treatment to remove impurities, the brine is transferred by pipeline, to where it is evaporated in a multiple effect process. The resulting suspension of salt crystals in brine is then centrifuged to yield undried vacuum salt. This is then dried by fluid bed drier to yield Pure Dried vacuum salt.

Vacuum Salt is ideal for brining and curing purposes.

Directly sourced, Himalayan pink rock salt is mined from salt seams formed around 600 million years ago from an evaporated inland sea. Rich in calcium, sodium, potassium and around 80 other trace minerals, it gets its infamous pink hue from its iron content. Being a natural and unspoiled salt, it makes an ideal salt lick for cattle and other farm animals.

Food Salt

Sugar

We supply Demerara Sugar and light brown sugar from British Sugar and Tate & Lyle, both are BRC registered. Demerara sugar is made from the natural juice of sugar cane. It provides sweetness and enhances the flavour of all types of food and is perfect for adding crunch and texture to baking, can also be used in fish curing and smoking and is available in a 25kg size.

Cosmetic Production Salt

The cosmetic industry has been using salt in many different ways over the centuries. Today the industry focuses on sustainability and natural products. We have a range of sea salts, white and Himalayan Pink rock salts, that are used in this industry. If we don't currently stock what you need, we will help try to find your ideal salt: info@peacocksalt.co.uk or call 01292 292 000.

cosmetics and
toiletries
producers all
over the UK

Dead Sea Bath Salt  

Authentic Dead Sea Bath Salt containing a mix of essential minerals, directly sourced from the Dead Sea. Ideal for use in the production of cosmetics, toiletries and bath salts.

Therapeutic and skin calming, these mineral salts can relieve muscle tension and help soak away the aches and pains of the day.

**Coarse Dead Sea Bath Salt
25kg Bag**

CODE: DBC0025

Himalayan Pink Rock Salt  

Directly sourced, Himalayan pink rock salt is mined from salt seams formed around 600 million years ago from an evaporated inland sea. Rich in trace elements calcium, sodium, potassium and around 80 other trace minerals, it gets its famous pink hue from its iron content. Popularly used in cosmetic products for its health properties.

**Himalayan Pink Salt
2- 5 mm Grain 25kg Bag**

CODE: HIMD250025

Rock Salt **K**

Pure white rock salt mined from seams created millions of years ago when the ancient seas of Europe were evaporated and covered with further sedimentations and rock.

These salts are typically high purity, dry and have defined crystal structure – the larger grain sizes are typically used in bath salts.

Vacuum Salt

Industrial Vacuum Salt

PDV Salt is a very high purity, vacuum salt which is fine and free flowing. Accredited to BRC standards, it is used in many cosmetic formulations.

**Industrial PDV Vacuum Salt
0.18-1mm Grain 25kg Bag**

CODE: IVS0025

Sea Salt

All sea salts are made by solar evaporation of natural sea brine. We offer a range of grain sizes to suit all needs and packaging options. We also offer Soil Association organic accredited Sea Salts.

We can source a large range of grain sizes so if you don't see what you need, please ask us: info@peacocksalt.co.uk or 01292 292 000.

Himalayan Salt Wall & Blocks

With a myriad of functions and visual appeal, we have been supplying Himalayan salt blocks for bespoke Himalayan Salt Wall features since 2014.

Popular in butcheries as a delicious and effective catalyst to the dry-ageing process, these walls are as purposeful as they are pretty. The list of uses never ends. We have supplied art installations, salt caves, butchers, specialist breathing rooms for the treatment of respiratory complaints, holistic therapy and yoga studios, spas and wellness centres, shop fronts and as a feature in trendy UK shops and restaurants.

HIMALAYAN
SALT CARE

The blocks are ethically sourced and hand-carved from ancient salt seams and the salt itself boasts over 80 different trace minerals with a range of health benefits. We source only the best quality salt blocks which are thick and compact, offering longevity and practicality. We can also offer replacement blocks when the time comes to replenish or renew your Himalayan Salt Wall.
