Jones and Clark Ltd along with their trusted supplier PFERD are offering a FREE overhaul of the abrasives you use. Technical experts from PFERD who are a global supplier of high quality abrasives made in their factory in Germany, will visit your premises to review the products that you use , watch them in application and evaluate their efficiency. When they return PFERD will bring FREE samples to conduct a structured trial to show the full benefits of their products versus your existing range, demonstrating the best products for your applications. PFERD will then send you a report of the results for you to evaluate the benefits of changing your supply to PFERD via Jones and Clark Ltd for ultimate savings of time, effort and money.
