

# QUARTERLY NEWSLETTER MARCH 2020

**jonesandclark**  
INDUSTRIAL SUPPLIES AND SOURCING SPECIALISTS

LET US SOURCE IT FOR YOU!

## Coronavirus 2019-nCoV

As employer, we all have a duty of care under Health and Safety law to support your employees during outbreaks such as coronavirus and to take precautions to prevent exposure. The best way to do this is to develop a plan describing not only how you are going to reduce the risk of infection but also how to respond in the event of an outbreak. Unfortunately, at present we can not supply any private products, Respirators, Sanitiser, Disposable Clothing, etc... due to the high demand our stocks and our supplier stocks have ran out with no replenishment dates available.

*Please see below a few other preventative measures to help during this time:*

1. Do NOT shake hands when greeting people.
2. Wash hands as regular as possible and keep to a regimented hygiene routine.
3. Wear protective products where necessary.

*If an individual reports experiencing these symptoms it would be good practice to:*

1. Explain that they will need to self-isolate, what that will involve and your organisation's policy on it.
2. If they are in the premises, ask them to depart by private transport as soon as possible in order to minimise exposure to colleagues (or move them to a private room if they are unable to leave immediately).
3. Ask them to use the NHS 111 or NHS online service on arrival at home.
4. Wipe down surfaces in your premises in the vicinity to which they have been working with cleaning products as a precaution and encourage those who have had close contact with them to wash their hands and be vigilant to viral symptoms.

The Chamber of Commerce launched new research analysing the impact that Coronavirus (COVID-19) related disruption has had on local businesses to date.
